MARIJUANA AND THE TEEN BRAIN
States with Legalized Marijuana Rank Top in Teen Use.

Share this information with your child/teen today.

What the Research Tells Us

The brain is not fully developed until the mid-20s and can be permanently damaged by Marijuana use.

- Marijuana use is linked to school failure, lower income, and poorer quality of life.
- Marijuana has negative effects on attention, motivation, memory, and learning.
- Users are MUCH more likely to get lower grades and drop out of school.
